Week 4

Putting it all together...

App Review

- Enlight-Photo manipulation, B&W, artistic effects, colour changes etc

- Eraser- Simple erasing app to remove backgrounds or whatever- I love the ability to paint the image back if you make a mistake

- Procreate- Layers, Brushes, Colours,and a myriad of other tools makes this the Everything APP, but it's complex and you need to really spend time with it to enjoy using it

More App Review

- Imaengine- Vector app, morphs photos into cartoon like images that can be resized to any level

- Paper53- Drawing/Watercolour painting app that also has the roller tool-simple to use, no layers

- Tayasui "Sketches"- Drawing Painting app with 4 layers. Simple User Interface (once you figure out how to import images). Paint effects can be applied with brushes to photos

More App Review

- Art Set Pro- Looks like you have a drawer full of painting tools. Very simple interface, no layers, choice of surfaces. Best oil painting and charcoal emulation (no watercolour effects.)

- Zen Brush 2- Emulates Chinese ink painting. No layers. Simple interface.

Art Concepts Introduced

- Basic tonal Theory

- Basic colour Theory

- "Turning the form" through tone or through colour

- Mark Making Techniques and Practices

Let's try it again…

Make the following marks:
1) Angry
2) Happy
3) Hesitant
4) Ebullient
5) Scared
6) Pompous
7) Energetic
8) Lethargic
9) Confident
10) Weak

# Paint the Following (or another landscape or setting):

Add someone or something (use Eraser App first for easier handling):

# Or erase in Procreate

Add something else(or not):

And yet something more (just PLAY!! This is how we learn best):

Draw or Paint what's needed:

Add colour and clean up:

Demo video

Now Homogenise the marks colours and textures in Enlight:

Or in Imaengine:

Your Turn to PLAY:

Thank you for sharing your past 4 Wednesdays with me:
